AYODELE AJAYI

OBJECTIVE

Looking to join a dynamic company that inspires a high level of work ethics as a motivated DevOps Engineer. I aim to constantly work with the team's vision to achieve constant success. Willing to implement all my acquired skills, open to learn new tools and achieve growth in the Company.

PROFESSIONAL ACHIEVEMENTS

- IMPLEMENTED INDUSTRY WORKING STANDARD FOR WORK AND REVENUE INCREASE BASED SUPPORTING

PROFILE SUMMARY

- Has over 10 years of experience working in the IT Industry
- Strong Infrastructure background implementing Cloud technology for Computing and Networking with Providers like Microsoft, Amazon, Digital Ocean and Google
- Possess security insights and implementations in Production environment
- Coding infrastructure and maintaining sustainable microservice architecture.

SKILLS

- Docker - Kubernetes - Terraform - Ansible - Prometheus/Grafana/StackDriver - Cloud Architecture in AWS, Google Cloud (GCP), Azure - Linux (Ubuntu, Debian, Centos/RHEL) - Automation - Gitlab, GitHub - Postgresql - MySQL/MariaDB, PostgreSQL - Apache - SSL Certificates - XML - JSON - REST API - Logs analysis - SSO/OAUTH2 - Customer relations - ITIL Processes - ISO27001 - The Open Group Framework

WORK HISTORY

SITE RELIABILITY ENGINEER/MANAGER

RANK GROUP PLC.

March 2020 till date

Achievements:

- Elastic Cloud with Logstash for Log Monitoring
- Docker Swarm for container Orchestration
- Nginx for Load Balancing application on the public face
- Application Performance Monitoring with Dynatrace and New Relic

- Synthetic Monitoring
- Dev Web Server with Apache, NGINX and Caddy
- Hashicorp stack (Terraform, Vagrant, Packer, Vault)
- Certificate issuance
- Encrypted Secret with Sealed-Secret
- Managing monolithic application on Windows and Linux Servers
- Building scalable microservices
- BDD Testing
- CI/CD with Jenkins
- Container registry Images configuration in Docker and AWS
- Version Control documentation
- Security Implementation

DEVOPS ENGINEER

ADJOINT INC.

August 2019 till March 2020

Achievements:

- Stack Driver for Log Monitoring
- Kubernetes and OpenShift for container Orchestration
- Docker for containerisation
- Telemetry configuration
- Code Testing
- Load Balancer configuration
- Web Server with Apache, NGINX and Caddy
- Certificate issuance
- Encrypted Secret with Sealed-Secret
- Infrastructure provisioning tool with Terraform
- Logs and Monitoring with Datadog, Prometheus and Stackdriver
- Managing monolithic application
- Building scalable microservices
- Client interaction and BRD reviews
- CI Build with CloudBuild (GCloud)
- Container registry Images deployed into Kubernetes Clusters (Staging and Production)
- Version Control documentation
- Security Implementation

IT ENGINEER/DEVOPS

OPENASSET (AXOMIC LIMITED)

January 2018 till July 2019

Achievements:

- Integration via REST API and Jenkins
- Code Deploy (AWS)
- GCP (Google Cloud) Application deployment in Cloud, security and software support
- CI/CD with Docker
- Provided users with Video and Image editing recommendations
- 80% First time resolution for issues in-house and remote users
- Averaged 2-hour time frame for Active Directory moves, adds and changes in file access and group membership
- Set up VOIP phone and added voicemail to email for all 70 corporate users
- Responsibility for maintenance on SharePoint, Lync and website
- Managed all inventory on computerized database for corporate and field offices

- Configured Windows Servers 2008/2012/2016 for GPO, deployments and permissions.
- Assessed security and advised on any detected vulnerabilities in the infrastructure (software, hardware, networks).
- Implemented Remote Assistance, Cloud Infrastructure, Administration, services used are Azure, Amazon and Google:
- Network planning & configuration
- App registration (Single Sign On)
- Active Directory
- Intune deployments
- MDM
- Security
- MySQL querying:
- Web Apps Administration
- User account management
- IIS Web Server Support
- JavaScript
- Python
- Linux

- Data Analysis
- VMWare
- Windows
- Networking
- Cloud Computing (Google Cloud, AWS and Azure)
- MySQL
- Application Security
- Cleaning CSV and JSON data Python
- REST API Implementations

IT SYSTEM ANALYST

INDIVIOR UK PLC

February 2016 to January 2018

Achievements:

- Instance testing with Docker Machines
- Provided technical support for 600+ users and ensured proper maintenance of workstations, printers and peripherals
- Responded to requests for technical assistance in person, via phone or email
