Summary

A bright, talented and ambitious SRE/DevOps/SysOps / Security / Application specialist with a strong technical background who possesses self-discipline and the ability to work with the minimum of supervision. Having exposure to a wide range of technologies & able to play a key role in diagnosing hardware, software problems, analyse network logs for security and to ensure that quality solutions meet business objectives. Possessing a good team spirit, deadline orientated and having the ability to organize and present complex solutions clearly and accurately.

Objective

I am looking to join a dynamic company that inspires a high work ethic as a motivated DevOps Engineer. I aim to constantly work with the team's vision to achieve constant success. Willing to implement all my acquired skills, open to learn new tools and achieve growth in the Company.
